

Transparency Report

July 1, 2019 - December 31, 2019

DNS.SB Transparency Reports are released twice a year. These reports inform the public about disclosure of user information and removal of content required by law enforcement and other government agencies.

Since legal processes, technology adoption, and other factors can impact the security and privacy of users, these reports contain information on user data disclosure as well as technical efforts to enhance security. We will not sell, rent, or give away any of your personal information without your consent. Our respect for customer privacy is equally applicable to commercial requests and to government or law enforcement requests.

In this transparency report, we will review the statistics for the second half of 2019, including:

- Requests for Content Data
- Requests for Basic Subscriber Data
- Requests for Other Non-Content Data
- Requests for Content Removal
- Requests for Content Blocking
- Requests for Uniform Domain-Name Dispute Resolutions

Read on for the details. If you are not familiar with any of the terms used in this report, please take a look at our official website (<https://dns.sb/>).

German government information request

Requests for User Information in accordance with German legal process.

Hong Kong	0	0	0	0	0	0
Estonia	0	0	0	0	0	0
Australia	0	0	0	0	0	0

Conclusion

DNS.SB remains committed to protecting personal privacy and maintaining transparency as essential parts of our commitment to our users. We will minimize the amount of data we disclose or the amount of content we take down as much as legally possible. Through our transparency reports, we're continuing to shed light on our own practices, while also hoping to contribute to broader discourse on platform governance. We will continue to publish this report on a semiannual basis. We hope that this report will be helpful to you. You are encouraged to let us know if you have suggestions for additions to future reports. Please be advised that we may restate data as we go forward as more complete information becomes available or if we change our classifications.
